Konrad, Raynes & Victor, LLP Suite 210 315 South Beverly Drive Beverly Hills, CA 90212			EXAMINER	MAGEE, THOMAS J
			ART UNIT	PAPER NUMBER
			2811	

DATE MAILED: 07/03/2002

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)	
	09/759,715	TSUGANE ET AL.	
	Examiner	Art Unit	
	Thomas J. Magee	2811	
<i>-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --</i>			
Period for Reply			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.			
<ul style="list-style-type: none"> - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). 			
Status			
1) <input type="checkbox"/> Responsive to communication(s) filed on ____.			
2a) <input type="checkbox"/> This action is FINAL. 2b) <input checked="" type="checkbox"/> This action is non-final.			
3) <input type="checkbox"/> Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.			
Disposition of Claims			
4) <input checked="" type="checkbox"/> Claim(s) <u>1-16</u> is/are pending in the application.			
4a) Of the above claim(s) <u>5-14</u> is/are withdrawn from consideration.			
5) <input type="checkbox"/> Claim(s) ____ is/are allowed.			
6) <input checked="" type="checkbox"/> Claim(s) <u>1-4, 15 and 16</u> is/are rejected.			
7) <input type="checkbox"/> Claim(s) ____ is/are objected to.			
8) <input type="checkbox"/> Claim(s) ____ are subject to restriction and/or election requirement.			
Application Papers			
9) <input type="checkbox"/> The specification is objected to by the Examiner.			
10) <input type="checkbox"/> The drawing(s) filed on ____ is/are: a) <input type="checkbox"/> accepted or b) <input type="checkbox"/> objected to by the Examiner.			
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).			
11) <input type="checkbox"/> The proposed drawing correction filed on ____ is: a) <input type="checkbox"/> approved b) <input type="checkbox"/> disapproved by the Examiner.			
If approved, corrected drawings are required in reply to this Office action.			
12) <input type="checkbox"/> The oath or declaration is objected to by the Examiner.			
Priority under 35 U.S.C. §§ 119 and 120			
13) <input checked="" type="checkbox"/> Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).			
a) <input checked="" type="checkbox"/> All b) <input type="checkbox"/> Some * c) <input type="checkbox"/> None of:			
1. <input type="checkbox"/> Certified copies of the priority documents have been received.			
2. <input type="checkbox"/> Certified copies of the priority documents have been received in Application No. ____.			
3. <input type="checkbox"/> Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).			
* See the attached detailed Office action for a list of the certified copies not received.			
14) <input type="checkbox"/> Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).			
a) <input type="checkbox"/> The translation of the foreign language provisional application has been received.			
15) <input type="checkbox"/> Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.			
Attachment(s)			
1) <input checked="" type="checkbox"/> Notice of References Cited (PTO-892)		4) <input type="checkbox"/> Interview Summary (PTO-413) Paper No(s). ____.	
2) <input type="checkbox"/> Notice of Draftsperson's Patent Drawing Review (PTO-948)		5) <input type="checkbox"/> Notice of Informal Patent Application (PTO-152)	
3) <input type="checkbox"/> Information Disclosure Statement(s) (PTO-1449) Paper No(s) ____.		6) <input type="checkbox"/> Other: _____.	

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Claims 1 – 4, 15 and 16 in Letter No. 8 of January 19, 2002 is acknowledged.

Claim Rejections – 35 U.S.C. 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office Action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 – 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohyu et al. (US 6,291,847 B1) in view of Lee et al. (US 6,215,142 B1), Choi et al. (US 6,040,596) and Takada et al. (US 6,110,772)

Claims 1 – 4 recite a DRAM device with capacitor coupled with a capacitor and resistive element added in an analog region on the same substrate. Ohyu et al. disclose a DRAM device with capacitors for storing information contained in cells, but do not explicitly disclose an analog device on the same substrate. Lee et al., Choi et al. and Takada et al. disclose the formation of capacitors and resistors as integral or peripheral elements in an IC or analog device. Takada et al. use ion implantation and diffusion to

adjust the doping (resistance) of layers in a semiconductor device (Col. 12, lines 23 – 39). Similarly, Choi et al. utilize ion implantation to adjust sheet resistance of peripheral resistors in a DRAM device (Col. 8, lines 52 – 55). Lee et al. also disclose the formation of capacitors and interconnects for an analog device. In each case, methods of forming separate device elements, including capacitors and resistive elements, in DRAM, analog, or related devices have been disclosed in prior art. Further, it is well established in the art that certain process features can be “simultaneously” formed during a process sequence. For example, forming a cell plate and a resistance element simultaneously is relatively routine in processing. In like manner, formation of dielectric layers (simultaneously) in different locations is also well established within the art.

It would have been obvious to one of ordinary skill to simply combine Lee et al., Choi et al., and Takada et al. with Ohyu et al. to obtain a semiconductor device comprising: a DRAM including capacitor, with a capacitor and resistance element of an analog element on the same semiconductor substrate.

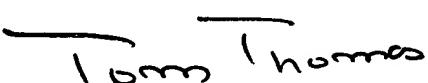

4. Claims 15 – 16 are rejected as unpatentable over Ohyu et al., as applied to Claims 1 – 4 above. As discussed previously, Ohyu et al. disclose formation of a DRAM device with capacitor elements, but do not disclose an analog device contained on the same substrate. Lee et al. disclose methods for forming capacitors and interconnects in analog devices, whereas Choi et al. disclose the formation of capacitors and peripheral

resistors in DRAM devices. Further, Takada et al. disclose methods of integrating capacitor and resistive elements in a semiconductor structure. Hence, it would have been obvious at the time of the invention to one of ordinary skill in the art to combine Lee et al., Choi et al., and Takada et al. with Ohyu et al. to obtain A DRAM structure including capacitor, with added analog elements containing capacitor and resistance elements on the same substrate.

Conclusions

5. Any inquiry concerning this or earlier communications from the Examiner should be directed to **Thomas Magee**, whose telephone number is **(703) 305-5396**. The Examiner can normally be reached on Monday through Friday from 8:30AM to 5:00PM (EST). If attempts to reach the Examiner by telephone are unsuccessful, the examiner's supervisor, **Tom Thomas**, can be reached on **(703) 308-2772**. The fax number for the organization where this application or proceeding is assigned is **(703) 308-7722**.

Thomas Magee
